

Questionnaire

Company name		
Address		
Contact person		
Contact details	tel.	e-mail
Date		

Fill in the following table as detailed as possible, which will allow us to define timing and costs of development of your project accurately.

Attention! If you have valid technical specification, other documentation please provide it with the questionnaire.

Project description	
Assigning device	
Application area (Functional description)	
Stages of development carried out by AXONiM Devices	
	Please mark YES or NO. Yes - development required No - development not required
Technical requirements development	
Specify which parts of the technical requirements we are to estimate / develop / implement	
Structural scheme development	
Electrical circuit development	
PCB development	
PCB layout development	
Production documents development	
Basic software development	
Application software development	
Prototypes production	
Test stand development	
Functional testing	
Housing development	

Production support (small-scale, mass)			
Planned terms of the project	Start		Ending
Budget for the project, USD	min		max
Financing: own means, budget, investment, otherwise specify, credit funds, etc.			

Technical requirements		
Device composition (display, type, memory amount, etc)		
External devices and interfaces (specification, quantity)		
Possible constructive solution (described in general terms, the form factor, size, material, etc., other features)		
Input / processed signal parameters (resolution, bit rate, sample rate, etc.)		
Power system (battery, electric network, parameters)	Power consumption / working hours	Operating temperature range
Planned seriality	Device target cost	Full or partial analog
Element base preferences		
Technical requirements documental demands (standards)		
Design requirements (size, form-factor, weight, etc.)		
Standards compliance		
Other project features		

Software requirements (for the hardware developed device)	
Operating system	
Hardware platform	
Software functional description	
Special algorithms description	

Supported devices (with an indication of the standards, interfaces, protocols)	
User Interface description	
Other software features	

Application Software Requirements (communiation with external devices phones, tablets, etc.).	
Operating system	
Hardware platform	
Software functional description	
Special algorithms description	
Supported devices (with an indication of the standards, interfaces, protocols)	
User Interface description	
Other software features
